

Experience

Junior Product Designer, *Full Nelsen*

Aug 2025–present | Boston, MA

- Design 0-to-1 products for clients in education, finance, B2B, and wellness, launching 3+ products by translate their business goals into cohesive, user-centered experiences
- Contribute to product definition and roadmap discussions with clients, representing user needs and experience risks, while engaging in stand-ups and retrospectives to continuously improve collaboration
- Deliver production-ready wireframes and interactive prototypes, while building design systems for new products or contributing to established ones
- Partner with engineering to ensure feasible solutions, support implementation through annotated specifications, and conduct design QA to identify usability, accessibility, and experience risks
- Apply user engagement data and user feedback to identify friction points, iterating on design solutions to ensure quality experiences
- Ensure WCAG accessibility standards across all products and marketing sites, including screen reader optimization, sufficient touch targets and contrast, and clear language

UX + Visual Designer, *Cherish Health*

Jan–Aug 2025 | Boston, MA

- Designed mobile and web apps for a health tech startup, helping users manage fall detection devices, navigate health information, and quickly interpret and respond to urgent events
- Conducted the startup's first qualitative research end-to-end, planning 8+ interviews and observational sessions with nursing home staff, then synthesized findings to inform design decisions supporting real-world workflows
- Translated research insights and requirements into 15+ production-ready flows and prototypes in Figma, validating designs through usability testing while balancing user needs with technical constraints and organizational goals
- Met data privacy and HIPAA compliance standards in the application by defining role-based dashboard views and transparent data-use messaging
- Designed cohesive experiences across digital and physical touchpoints, ensuring accessibility and consistency throughout the entire customer journey

UX/UI Designer, *Centrova*

Jun 2024–Jan 2025 | Boston, MA

- Conducted qualitative user research for a medtech startup, leading 5 interviews and using task analysis to map clinical trial coordinator workflows to define core product requirements
- Designed an investor-facing marketing website, delivering high-fidelity, production ready UI designs in Figma aligned with business goals
- Developed the site's content strategy, translating complex medical information into clear, plain language for non-technical audiences

Visual Design Intern, *MathWorks*

May 2023–Sep 2023 | Natick, MA

- Designed high-fidelity wireframes and a visual style guide for an internal event management app, ensuring a consistent UI experience across platforms
- Designed instructional signage and event posters for physical spaces on the company campus, applying established brand guidelines to ensure cohesion
- Simplified technical information into clear infographics for internal stakeholders and public-facing communications
